Dear Delegates, Colleagues, and Industrial Partners,

It is a real pleasure for SICOT to have this important 16<sup>th</sup> SICOT Trainees' Meeting in Poland. Polish orthopaedists have a long tradition of being leaders and developers of orthopaedic surgery. The Organizing Committee chaired by Prof Andrzej Bohatyrewicz has been very successful in creating an outstanding scientific programme which reflects the high development of orthopaedic surgery in the region, ranging from basic science to clinical management. The meeting is, therefore, an exciting event for young surgeons to explore the multiple challenges of today's orthopaedics.

SICOT welcomes you to this extraordinary teaching event in Kolobrzeg.

Yours sincerely,

Prof Cody Büniger  
SICOT President

Dear Colleagues,

80 years after SICOT was founded in Paris, Poland has the honour and privilege for the first time in its history to invite world famous orthopaedic surgeons to the 16<sup>th</sup> SICOT Trainees` Meeting taking place in Kołobrzeg. What is so special about this event?

First, if you look at the map of Europe, you will find Poland, an almost square country in centre bordering Russia, Lithuania, Belarus, Ukraine, Slovakia, the Czech Republic and Germany with two more neighbours across the Baltic: Denmark and Sweden. Together that is nine neighbouring countries.

Our permanent aspiration for freedom and independence has become fruitful. In 2004, Poland became the member of the European Union. It seemed a very good idea to celebrate this with scientific events. Professor Piotr Biliński started his project of organising the SICOT Trainees` Meeting in Bydgoszcz in June 2004. Unfortunately, it was cancelled at short notice because of his sudden unexpected death in December 2003. However, what has begun must be completed.

Polish Orthopaedics and Traumatology started in 1928 when two enthusiastic scientists and surgeons, Prof Wierzejewski and Prof Gruca, created the first Polish Orthopaedic Society. There were two so-called schools of Polish orthopaedics: the first one, developing around the University Medical School in Warsaw, was led by Prof Adam Gruca, and the second one in Poznań by Prof Wiktor Dega. Nowadays, the Polish orthopaedic family numbers about 2,500 members. Hundreds of our orthopaedic surgeons emigrated and work in all parts of the world.

Poland is country of many symbols. The democratization of Central and Eastern Europe started here and now it ended with the independence of many countries. However, that part of history is already over and now we have another aims and duties. In the era of globalization we want to share experiences in orthopaedics and traumatology with leading orthopaedists from all over the world, to learn and teach, to help and get help, to work towards a better future. SICOT meetings are very good tools for these purposes.

My colleagues from “new” European countries have declared their interest in coming to Poland. Based on our experience they would like to organize Trainees` Meetings in 2010 and 2011 designed to intensify international orthopaedic cooperation and to provide high-quality education for young (and not only young) orthopaedic surgeons.

## ORGANIZING OF SCIENTIFIC PROGRAMME

### Lectures

Official languages at the Trainees Meeting is English.  
Scientific sessions are organized according to subjects:

- Subject I: Reconstruction of bone in osteoporosis and metastasis
- Subject II: Management of posttraumatic arthritis
- Subject III: Motion against arthrodesis
- Subject IV: Multitrauma management
- Subject V: Free subjects
- Sponsored sessions

### Lecture Halls

Lectures will be held in lecture halls in main building of Arka Medical Spa, Sułkowskiego 11, 78-100 Kołobrzeg. There are two halls: Conference Room in 1st floor and Panorama Room in 11th floor.

### Presentations

The point of collecting presentation will be situated in both halls Conference Room and Panorama Room.

Lecturers are requested to submit presentations in electronic form in breaks before the beginning of the session. Please, do not forget to collect your slides when the lecture is over.
